

**Please join us for a free  
four-hour workshop on  
July 29, 2004.**

This workshop will train you to easily and cost-effectively run an environmentally-friendly medical facility. The workshop will demonstrate pollution prevention techniques that not only save the environment but can also save money. Learn about new changes in environmental regulations pertaining to the medical industry. The following topics will be covered during the workshop:

- *Mercury reduction*
- *Waste Minimization*
- *New and existing Universal Waste Rules*
- *Expired/unused pharmaceutical disposal*
- *Changes in medical waste disposal regulations*
